

### AMENDMENTS TO THE SPECIFICATION

On page 4, please amend the paragraph on lines 12-24 to read as follows:

In the case of both the pelleted form and the tabletted form of the invention an enteric coating agent is placed over the core. In both cases the enteric coating material may comprise an acid resisting material which resists acid up to a pH of above about 5.0 or higher which is selected from the group consisting of cellulose acetate phthalate, hydroxypropylmethyl cellulose phthalate, polyvinyl acetate phthalate, carboxymethylethylcellulose, co-polymerized methacrylic acid/methacrylic acid methyl esters such as Eudragit L (poly(methacrylic acid, methylmethacrylate), 1:1 ratio; MW (No. Av. 135,000 - USP Type A) or Eudragit S (poly(methacrylic acid, methylmethacrylate), 1:2 ratio; MW (No. Av. 135,000 - USP Type B) and mixtures thereof.
